SAYS SUGAR TRUST PAID TO AVOID SUIT

Former Official Swears the Government Collected More Than Was Due.

By International News Service WASHINGTON, Feb. 1.-The Amer ican Sugar Refining company paid the government \$500,000 more than necessary that it might avoid a conflict with the gov ernment and a repetition of the publicity attendant on the weighing fraud scandals. This was the testimony of James P. Gerry, a former employee of the customs division of the treasury department, today before the ways and means com

today before the ways and means committee.

The government, explained Mr. Gerry, followed its suit against the sugar trust for false weighing with a demand for \$150,000 under the drawback provisions of the tariff law. Exact computation of these drawback duties, due because of the underweight frauds, placed the American Sugar Refining company in debt to the government to the extent of \$250,000. "The question was put up to Mr. Thomas, then head of the American Sugar Refining company." said Gerry. "He decided that it was better to pay the \$750,000 than go to the courts because the American Sugar Refining company, bathes \$750,000 than go to the courts because the American Sugar Refining company had been given an unenviable reputation by the exposure of the weighing frauds. So the American Sugar Refining company paid \$750,000."

Gerry cited this as a reason why there should be a change in the administrative features of the country should not be in terror of the law and held that there should be some redress, even though officials and employees of a company may have gone astray previously.
